Acrylic Production

Elgin, IL | Monday – Friday, 8:00 a.m. – 4:30 p.m.

If you have an aptitude for the trades and enjoy a fast-paced, interesting environment, we have a unique position that may be just the right fit for you! In this role you will be trained to complete a variety of tasks related to the building of our custom displays and acrylic shields.

- To succeed in this position, you must thrive in a fast-paced environment - our customers demand fast turnaround and we deliver!
- You must also work well with others internally and contribute to a positive work environment.

In this position you will:

- Precision cut and glue a variety of types and sizes of acrylic products. Gluing is a precise and detailed process.
- Routing, Sanding and Polishing Acrylic to fine finishes.
- Packing finished goods (including cutting corrugated cardboard and packing foam to custom sizes).
- Assist with cutting, finishing, packaging, shipping and/or other areas as needed based on business needs.

Requirements:

- Experience in a custom production environment working with a variety of hand tools.
- Ability to work to exacting measurements with a high level of detail. History of producing work that is accurate and precise.
- Strong math skills - ability to read measuring devices and calculate fractions
- Able to Stand 8 hours and work entire shift.
- Willingness and ability to work overtime when required to meet customer order requirements.
- Works in a safe and efficient manner in accordance with company policies and procedures.
- (after training) Works independently with minimal direction
- Excellent attendance and reliability.
- Flexible – willing and able to perform a variety of duties

Additional skills that are beneficial:

- Ability and experience spray painting products using HVLP equipment (high volume low pressure) equipment
- General carpentry skills: Ability to perform light carpentry, creating cabinet bases and other products as needed
